

Intelligence Led Policing for Higher Education

Campus law enforcement/security administrators can no longer afford to respond to contemporary and future problems with the “solutions” of yesterday. Intelligence-led policing is a collaborative enterprise based on improved intelligence operations and crime prevention (community-oriented policing and problem solving). Implementing intelligence-led policing on a College/University campus requires campus law enforcement/security organizations to reevaluate their current policies and protocols. It requires intelligence to be incorporated into the planning process to reflect campus community problems and issues. It is more than information gathering, intelligence must be contingent on quality analysis of data, with information sharing as part of policy, not an informal practice. This presentation will discuss the campus framework involved in operating intelligence led policing on campus. We will discuss best practices and success stories as well as hurdles and obstacles that must be overcome.

Jacob Mouro **Senior Security Specialist** **Romanyk Consulting**

Jacob Mouro, CPD ICPS CPP – Jacob is currently the Senior Security Specialist for Romanyk Consulting, primarily conducting Physical Security Design assessments of Veteran Association Medical Centers. From 2001 to 2016 he worked for the University of Michigan Division of Public Safety, ending as the Manager of Infrastructure Protection.
