# Senior Fraud

---

Senior citizens are prime targets for today's tech-savvy criminal. They are especially vulnerable due to their lack of knowledge of technology, and how it works. This presentation will give you information to take back to the senior citizens in your community, and educate them on the dangers of phony investment scams, telemarketing calls, ATM Skimmers, and guarding their nest egg. This class will also cover signs of identity theft, and what to do if you think your identity has been stolen.

**Chris Sharp**  
**Police Officer**  
**US Health - Department of Public Safety**
